Lifeline and Link Up Reform and Modernization, WC Docket No. 11-42  
Telecommunications Carriers Eligible for Universal Service Support, WC Docket No. 09-197  
Connect America Fund, WC Docket No. 10-90

Dear Chairman Wheeler, Commissioner Clyburn, Commissioner Pai, Commissioner Rosenworcel, and Commissioner O’Rielly:

As California Legislators, we are committed to closing the Digital Divide because it is one of the most powerful strategies to help the next generation succeed in a competitive global economy. Access to affordable high-speed Internet at home is a vital tool to achieve this goal. We commend the Federal Communications Commission (FCC) for establishing a visionary path to empower all Americans with high-speed Internet access in the National Broadband Plan and we support your announcements to provide a widely-available affordable broadband rate for all low-income households through a Broadband Lifeline Program.

We know that you understand the importance of technology today to empower low-income residents in poor neighborhoods. More than 20% of all California households remain offline and in this Digital Age are being left behind at an accelerating pace—increasingly being disenfranchised from the democracy itself because so much government information and so many public services are online. According to the 2015 Annual Survey on broadband adoption in California (sponsored by the California Emerging Technology Fund and conducted by the Field Research Corporation), the Digital Divide persists for disadvantaged communities with large percentages of households not connected at home—35% of low-income households (under $20,000 annual income); 30% of Latino families (37% for Spanish-speaking households); and 41% of people with disabilities. Yet,
participation in daily life requires broadband access at home—job and college applications, school homework, healthcare coverage, workforce training, and education scholarships.

We also know that it takes a “trusted messenger” to reach offline households. Research shows that there are 3 primary barriers to broadband adoption: (1) Cost; (2) Relevance; and (3) Digital Literacy. An effective Broadband Lifeline Program must provide dedicated funding for community-based organizations (CBOs), schools and libraries to assist providers with in-language and in-culture outreach, digital literacy training, and sign-ups for subscriptions to successfully close the Digital Divide. Further, there must be transparency and accountability to achieve tangible results.

Therefore, we respectfully urge you to design a successful Broadband Lifeline Program by taking the following actions:

- Establish an affordable high-speed Internet service plan for all low-income households offered by and through all broadband providers (in the $10/month range) with sufficient speeds and a wireless modem for compatibility with school-issued devices. A Broadband Lifeline Program should augment Telephone Lifeline and not force consumers to choose between the two necessary technologies and programs.

- Capitalize an independent fund to support community-based organizations (CBOs), schools and libraries (as “trusted messengers”) through performance-based grants to assist in enrolling eligible low-income households and participate in true public-private partnerships.

- Appoint an oversight advisory body to ensure transparency and accountability with a broad base of stakeholders and community leaders knowledgeable about broadband adoption.

We embrace the goal in the National Broadband Plan “to create a high-performance America—a more productive, creative, efficient America in which affordable broadband is available everywhere and everyone has the means and skills to use valuable broadband applications.” You have the opportunity to significantly move towards achieving this goal by enacting a workable Broadband Lifeline Program. We urge your bold action and we welcome the opportunity to work together to get all Californians and all Americans online.

Sincerely,

Re: Expanding Broadband Access

Dear Chairman Wheeler, Commissioners Clyburn, Pai, Rosenworcel, and O’Rielly:

As Chair of the California State Assembly Utilities and Commerce Committee, I understand that access to affordable high-speed Internet is a vital tool to ensure that individuals have the skills necessary to succeed in a competitive global economy. I commend the Federal Communications Commission (FCC) for its commitment to ensure that low-income households have access to affordable broadband rates.

Access to broadband services is vital for navigating daily life. More than 20% of all California’s households still remain without adequate broadband access. Inadequate broadband services makes it more difficult for students to do their homework and for people to find jobs and get the necessary training and information to stay competitive in today’s workforce. Often times, the primary barriers to broadband adoption are (1) costs; (2) relevance, and (3) digital literacy. These barriers are persistent in many disadvantaged communities, such as those in the district I represent. My district is made up predominantly of moderate- and low-income Latino households, and whether or not these communities are reached will determine the success or failure of any program.

Hence, I urge the FCC, when designing a program to expand broadband access, to ensure that the program is designed in a way that provides equal access and funding for all communities in order to close the digital divide. In designing the program, I urge the FCC to establish affordable high
speed Internet for low-income households and other minority communities, and that these programs are transparent and are held accountable to the communities we represent. I look forward to working together to ensure that all Americans have access to affordable broadband services.

Sincerely,

ANTHONY RENDON
Assemblymember, 63rd District

Re: Broadband Lifeline Rate

Dear Chairman Wheeler, Commissioner Clyburn, Commissioner Pai, Commissioner Rosenworcel, and Commissioner O’Rielly:

As a California State Senator I am committed to helping the next generation succeed in a competitive global economy. Access to affordable high-speed Internet at home is a vital tool to achieve this goal. We commend the Federal Communications Commission (FCC) for establishing a path that closes the Digital Divide and empowers all Americans with high-speed Internet access in the National Broadband Plan. Most importantly, I support your announcement to provide a widely-available affordable broadband rate for all low-income households through a Broadband Lifeline Program.

I appreciate your understanding of the importance of technology today and its ability to empower low-income residents in poor neighborhoods. More than 20% of all California households remain offline and in this Digital Age are being left behind at an accelerating pace—increasingly being disenfranchised from the democracy itself because so much government information and so many public services are online. According to the 2015 Annual Survey on broadband adoption in California (sponsored by the California Emerging Technology Fund and conducted by the Field Research Corporation), the Digital Divide persists for disadvantaged communities with large percentages of households not connected at home—35% of low-income households (under $20,000 annual income); 30% of Latino families (37% for Spanish-speaking households); and 41% of people with disabilities. Yet, participation in daily life requires broadband access at
home—job and college applications, school homework, healthcare coverage, workforce training, and education scholarships.

We also know that it takes a “trusted messenger” to reach offline households. Research shows that there are 3 primary barriers to broadband adoption: (1) Cost; (2) Relevance; and (3) Digital Literacy. An effective Broadband Lifeline Program must provide dedicated funding for community-based organizations (CBOs), schools and libraries to assist providers with in-language and in-culture outreach, digital literacy training, and sign-ups for subscriptions to successfully close the Digital Divide. Further, there must be transparency and accountability to achieve tangible results. Therefore, we respectfully urge you to design a successful Broadband Lifeline Program by taking the following actions:

- Establish an affordable high-speed Internet service plan for all low-income households offered by and through all broadband providers (in the $10/month range) with sufficient speeds and a wireless modem for compatibility with school-issued devices. A Broadband Lifeline Program should augment Telephone Lifeline and not force consumers to choose between the two necessary technologies and programs.

- Capitalize an independent fund to support community-based organizations (CBOs), schools and libraries (as “trusted messengers”) through performance-based grants to assist in enrolling eligible low-income households and participate in true public-private partnerships.

- Appoint an oversight advisory body to ensure transparency and accountability with a broad base of stakeholders and community leaders knowledgeable about broadband adoption.

We embrace the goal in the National Broadband Plan “to create a high-performance America—a more productive, creative, efficient America in which affordable broadband is available everywhere and everyone has the means and skills to use valuable broadband applications.” You have the opportunity to significantly move towards achieving this goal by enacting a workable Broadband Lifeline Program. We urge your bold action and we welcome the opportunity to work together to get all Californians and all Americans online.
